

There's a Message in This Bottle That's *Very* Green!

As the first thermoforming company to open its own in-house plastics recycling facility, the environmental benefits PWP generates keep adding up. Big energy savings—equivalent to powering **25,000 homes** a year. Reduced carbon dioxide emissions—equal to taking **5,000 cars** off the road for a year. Less landfill—equal to a full **28 football fields** piled one yard high. And a steady stream of FDA-compliant food packaging products, all made from *post-consumer* plastic bottles.

Now *That's* Thinking
Beyond Today.
